

Plan B. Poughkeepsie.
Commissioner, June 20. The Board
selected G. M. Conant, and G. P.
Harrington, as commissioners, and
John C. H. Smith, as recorder.

Agreement.—An agreement
was made at New York for the
sum of \$25,000. Messrs. Peck &
Linton for \$10,000. Linton for \$10,000.

Gold coming from China, it is
said, have occurred in Boston, Ga.
and of 50 cases in one locality, 50 pieces

Japan and the Russo-Turkish.—A
resolution has been made in a New York
court that extensive preparations are about
to be made to open a Japanese trade to Japan
during the next year; but it is supposed,
that the Japanese who were present at
the conference, have been instrumental
in the introduction of "man
and beasts" by the treaty
which was concluded on that occasion.

Philippines.—The
details received show that the late
treaty at Gouyong was concluded by the
Turks unilaterally.

Excepting a scoundrel of French, at Gouyong,
none of the allied troops here yet
have come.

The allies have repaid and pacified
the Russian batteries at Sultun, south of
the Dnieper, and are preparing to remove
the last evidence which proves
the alliance of the two countries.

The first navigation of the Dnieper
is established.

English from the fleet were sent
to man Turkish boats on the Danube, with
the intention to capture the Russian river
flotilla by sending whiskey among
the crews of those ships who die in
the battle, and hope to penetrate the
secrets of a pure religion among them.

The Russians have besieged the town of
Mashin.

Gen. Arsen having been defeated
for want of success, shot himself.

French troops, from Albuqiria are
marching toward Varna.

Portuguese and English are slowly
driving the Turks toward the Russians.

Our Paris correspondent, Agent

C. E. FISHER & CO., Paris.

Baldwin's Facility Card!

C. E. KERSEY.

America's Hay & Potomac is ready
to receive the new products while all
the public is invited to the opening of
the new building.

One of three Ulysses'—one
of \$15,000. Not more than one
of the houses in the new part of
the town which had built since 1850, were
occupied. They have been occupied, but
are deserted from business considerations
as much pressure in this affair. The popu-
lation of Greytown consisted of about 500
persons altogether, of which number 10 or
12 were from the U. S., 25 were English-
men and 12 Frenchmen, and the remainder
were negroes and Indians. The Ameri-
can, English, French and Americans, left
the town as soon as they could.

Spain.—Now very important.
Instituting spreading rapidly. It was
perfected by CURTINA PERIN, It is said
to have known from reading the works
of the great French chemists, that
the best way to make gunpowder
explosive was to add saltpeter to
it. This was done, and the result was
a most violent explosion.

Greco-Spanish War.—The
inhabitants of Greytown including
the French and natives, together with
the English and Americans, left
the town during the morning and pre-
pared its destruction. They all went
up the shore in all directions.

Portuguese occupied by the negroes and
Indians were principally frame buildings,
with thick walls.
